ADDITIONAL INFORMATION:  
Valve Stab Receptacle with 6 individual hydraulic lines for long term submersion, when connected to external CP system. Equipped with a key system to ensure only male stab with correct key (white colour) can be inserted (BA8369).  
A mechanical lever arm reduces stab mating force.  
When stab is inserted and valves opened (red position) a weak link system ensures that the stab can be pulled out in an emergency situation, emergency release force approx. 3kN.  
This receptacle is special configured with an open cartridge (no seals) in port no. 1 which enables fluid communication between receptacle port 1 and ambient seawater when receptacle is in Closed Position (green).  
For more information - request usermanual 600142-TD-0001.
