 ADDITIONAL INFORMATION:  
 Male Valve Stab with 6 individual hydraulic lines. Designed for short term submersion in intervention applications.  
 This valve stab is equipped with a universal key and can be inserted and mated with receptacles with any key. The stab will also fit into standard receptacles without key.  
 The Valve Stab hydraulic connection system is a pressure balanced hydraulic connector system with integrated ball valves in all ports on both the male and female side. Can be connected and disconnected with full system pressure, water ingress and pollution to sea during connection and disconnection is negligible.
